"Events"

This application is designed to make people find new friends and companies that they like. Briefly about the application: for sure, you walked along the street and saw that there was some kind of event that you didn't know about. And so, this application is for you to find out everything about this event (After all, we can scan this place and you will get a call and info about this event). And also you can create your own event and call people there, mark it on the calendar and wait for this day to come

Come out and freshen up!

I think this application will help other people in search of new friends and knowledge of society.
